

Krogab[®] JUICE

MAXI JUICE DISPENSERS

The Maxi range of dispensers are powerful, modern and user friendly. Kind to the environment and with a high capacity they will reduce wastage and save time whilst providing a cost-effective back of house operation. These machines are the perfect solution for high volume organisations – dispensing 1 litre of juice in less than 16 seconds thanks to the internal water booster. Krogab Juice have 3 dispensers in the Maxi range, all of which feature state of the art technology and illuminated displays - perfect for customisation.

FSD4000

With the FSD4000 you transform fresh tap water and fruit juice concentrate with one touch to a high-quality, cooled fruit juice. Additionally, cooled drinking water can be tapped separately. A very easy, modern machine to use and maintain.
