

FILTER & BULK BREW COFFEE MACHINES

If you are looking for a hassle free way of servicing a consistent demand for freshly filtered coffee and hot water, then our range of Filter & Bulk Brew Coffee Machines will be right for you.

Suitable for medium to high volume requirements, these machines are proven to deliver on both quality and reliability.

Krogab Café have a range of three easy to use models, each of which has been selected to fulfill a particular type of setting. The Jet Filter Coffee Brewer is one of our most compact coffee machines but can provide batches of up to 6 litres. Alternatively if you are looking to deliver very high volumes you can choose from the Qwikbrew or Maxibrew Twin, both of which are suitable for hotels, banqueting and large canteens.
